

# RECOVERING AMERICA'S WILDLIFE ACT

FORTENBERRY (R-NE) & DINGELL (D-MI)

H.R.4647

## Why support H.R.4647?

### Good for wildlife. Good for business. Good for Texans.

- It's a bipartisan bill that does not create new taxes.
- It was developed with input from national leaders in wildlife conservation, the oil and gas industry, and outdoor recreation.
- It directs royalty revenue from oil and gas production on federal lands and waters to wildlife projects.
- Texas would be eligible for over \$63 million annually to fund qualified projects conducted by Texas state agencies, land trusts, conservation organizations, universities, and private landowners.
- Keeping species off the Endangered Species List is good for wildlife, good for business, and saves the taxpayer money.
- We depend on healthy ecosystems for food, fiber, clean water, clean air, and outdoor recreation. These funds will help us conserve our natural heritage for present and future generations of Texans.
